About Kony Labs
Kony Solutions and the Kony Mobile Application Platform™ enables Fortune 500 companies to offer consumers and employees feature-rich mobile applications in less time and at lower costs than any other solution. Leveraging a *Write Once, Run Everywhere* single application definition, applications are designed and developed

just once, in a device-independent manner, and deployed across multiple channels, including native applications, device-optimized mobile web, SMS, web gadgets, desktop applications, and tablets. Kony's unique platform is proven to future-proof a company's mobile investment by enabling applications to be changed once for all channels, ensuring faster adoption of new operating systems and standards as they are introduced, while eliminating maintenance, upgrade and future development costs.

The Kony Mobile Application Platform provides clients with Kony's proven *Write Once, Run Everywhere* single application definition for designing, developing, deploying and managing holistic mobile applications across all mobile systems on the market today. This includes more than 8,500 mobile devices, tablets and popular operating systems, including truly native applications for iPad, iPhone, Android, BlackBerry, Symbian, J2ME, Windows Phone 7 and Palm devices. In addition, Kony's platform also supports device-optimized mobile websites for more than 15 browsers, such as Apple Safari, Google Chrome and Firefox with support from WML through HTML5, depending on browser capabilities and device form factors. Kony's technology provides the best available user experience with a super-set of mobile capabilities that are uniquely optimized for each mobile device and are exposed within the Kony API and Kony Studio toolset. This ensures that *all* applications and mobile websites running on *all* devices and platforms can be developed using a single code base - the *Write Once, Run Everywhere* value of Kony's Mobile Application Platform.

United Airlines, Toyota Motor Sales, U.S.A., and a leading global financial services company with presence in more than 46 countries are among the 35 Fortune 500 global companies that use Kony Solutions for the development, deployment and maintenance of their mobile offerings. Kony's clients include leading companies in the travel, media, retail, automotive, insurance, healthcare and financial services markets.

Please let me know in case you have any questions!

Regards,
Joseph Kumar Yeruva - **Executive – TA**
